Reference : Jason Bullen – Building & Roofing Contractor

To Whom it may concern,

We are writing to recommend the work of Jason Bullen with regard to the work he has undertaken for us on two occasions as a building and roofing contractor.

Jason and his team have recently helped us to undertake a self build bungalow. He took responsibility for the foundations as specified by our architect, including the siting of the drainage works and other services. Liaised with our timber frame supplier where required. Fitted a steico woodfibre sarking board to the roof rafters and slated the roof. Built up a block skin to the outside of the timber frame. Fitted some internal studwork as required, and battened out the external face of the blockwork ready for cladding to be fitted. All this work was completed to a high standard, which we are very pleased with.

Jason also liaised with our building control officer where required, and recommended various contractors and suppliers during the build which has helped us to make the right decisions on various aspects of the build as it has progressed.

Jason previously undertook an extension to a previous property we owned which was also completed to a high standard as above.

We will be using Jason and his team for more work over the next few months as we bring our self build project to completion.

Jason`s advice during the selfbuild, has been invaluable to the successful progress already made, and will continue to be so in the future.

We have no hesitation in recommending Jason and his team to anyone embarking on building works in the future, and would have no objection to being contacted if required.

Kind regards

Tim & Theresa Lovell
